

APPLICATION NUMBER		23/01093/LBALT	
SITE ADDRESS:		Ashbourne Methodist Church, Church Street, Ashbourne	
DESCRIPTION OF DEVELOPMENT		Construction of extensions, internal and external alterations to existing church, associated buildings and Chapel House including demolition, creation of community garden and associated works.	
CASE OFFICER	Sarah Arbon	APPLICANT	Ashbourne Methodist Church
PARISH/TOWN	Ashbourne	AGENT	Mike Harrison – Allan Joyce Architects Ltd
WARD MEMBER(S)	Cllr R. Archer Cllr N. Wilton Cllr A. Bates	DETERMINATION TARGET	12 th December 2023
REASON FOR DETERMINATION BY COMMITTEE	Linked to major application	REASON FOR SITE VISIT (IF APPLICABLE)	For members to fully assess the impact of the works on the heritage assets engaged

MATERIAL PLANNING ISSUES
– Impact upon heritage assets

RECOMMENDATION
<p>That authority be delegated to the Development Manager or Principal Planning Officer to grant listed building consent, following confirmation from Derbyshire Wildlife Trust in respect of the associated full application (code ref. 23/01092/FUL) that the works are acceptable with or without changes that do not require listed building consent, subject to the conditions as set out in section 8.0 of this report and any additional conditions recommended by the Trust that are relevant to this application.</p>

1.0 THE SITE AND SURROUNDINGS

- 1.1 The site is located prominently on the corner of Church Street and Station Road within the Ashbourne Conservation Area. The main church is grade II listed (listed 1992) and the adjacent Century Hall (and front wall with railings) is also listed grade II (listed 1992). The lower ground floor of the church includes hostel style accommodation rented out for about 100 nights per year. The church was built in 1880 and Century Hall in 1900. In association with these principal listed buildings/structures are Chapel House (on the eastern side of the site), the small shop (on the western side adjacent to Station Road) and the Corner Café of 1902) located on the corner of Church Street and Station Road. These would be deemed curtilage-listed buildings. To the southern end of the site is a modern pre-fabricated building which has no heritage status.

2.0 DETAILS OF THE APPLICATION

- 2.1 The proposals involve the construction of a new extension to be primarily located within the courtyard adjacent to Station Road and formed by the church, Century Hall and the Corner Café. This courtyard (parts of which are lower than the adjacent road level) is bounded to Station Road by a brick wall and decorative metal railings (listed as part of Century Hall). The proposals also include for the retention of the detached Chapel House (and its alteration and extension) and the demolition of a detached 'pre-fab' building in the grounds and the removal of a modern lean-to attached to the small shop. The land between the buildings and the Henmore Brook is to be landscaped as a 'community garden'.
- 2.2 The proposed new extension is to be attached to the side of Corner Café and to the side (west) elevation of the main church building. It is set back (at a shallow angle) from the majority of the north elevation of Century Hall. This 'Upper Ground' plan includes an entrance lobby, foyer, two staircases, a platform lift and a spinal corridor adjacent to the west elevation of the church. One set of stairs (and platform lift) access this higher level corresponding to the internal floor level of the main church itself forming the spinal corridor along the external side of this part of the church and the formation of a new double-doorway into the main body of the church. This corridor continues southwards to give access into the rear of the main church, into Century Hall and to a new extension containing toilets. The other staircase (and platform lift) descends to a 'Lower Ground' level. This contains toilets, a storeroom and meeting rooms. A void or light well (fully glazed) provides some natural light/ventilation to this subterranean level. Below the new toilets, at the southern end of the proposed scheme, is an extension to the communal areas forming a 'living' space. The new extension involves the breaching of the existing brick boundary wall and railings to Station Road to create an access point into the new extension off Station Road.
- 2.3 The primary concept behind the new extension is to physically link the three buildings on the site – the Church, Century Hall and the Café. Its location is such that it is housed in a deep 'area' to the west of the church allowing a lower ground level for additional accommodation/use. The lower ground floor would provide seven en-suite bedrooms with communal kitchen, dining area and lounge. The extension has been designed and formulated to allow inclusive access to all of the three buildings bringing the three disparate buildings around a focal and communal hub. The design concept of the extension is 'contemporary' with the use of structural glass, zinc cladding and a cladding (stone colour).
- 2.4 The proposals involve the retention of Chapel House (as a curtilage-listed building) with a small extension/alteration and convert it to 2 No. apartments. The modern conservatory is to be removed and replaced by a rendered 'box' with a flat roof over.

2.5 This proposal presents an updated design of a previously granted Listed Building and Planning Application (ref:20/01035/LBALT and 20/01034/FUL) and the subsequently approved variations to Condition 2 (Approved Plans) (ref:22/01278/VCOND and 22/01279/VCOND). Following the approved variations to Condition 2 noted above, the proposed design has been further amended primarily as a result of the successful Levelling Up Fund (LUF) 'Ashbourne Reborn' bid by Derbyshire Dales District Council, which was granted in March 2023. The Link Community Hub project is a key component of the wider bid and so a review of the scheme was taken to best meet the Levelling Up Fund criteria..

2.6 The review included:

- Omission of the new housing and sale of that land that is no longer required to make the project financially viable. In place, a community garden is proposed.
- Further upgrade of the existing Gateway accommodation and sub-division into family sized hostel-style rental spaces. Chapel House will be similarly developed.
- Further upgrade and renovation work to the existing building group, including a full re-roof of the Church and Century Hall

5.0 CONSULTATION RESPONSES

Ashbourne Town Council

- 5.1 No Objection. Members asked that flood alleviation be taken into account in relation to adjacent properties and also the surface water run-off.

Historic England

- 5.2 No comments

Design and Conservation Officer (Derbyshire Dales)

- 5.3 It is considered that the principle of a modern, contemporary, extension within the courtyard is an acceptable proposal in this context but this is heavily reliant on its constructional details and materials and its relationship and abutments etc. with the adjacent buildings. It is considered that the use of a zinc cladding (subject to approval of a sample and its proposed colour finish etc.) in combination with the extensive use of structural glass will convey a relatively 'light' architectural infill to the courtyard and will be complimentary to the ornate period architecture, detailing and materials etc. of the three existing buildings surround it. It is considered that the proposed replacement structure/building to the rear of Century Hall is an acceptable replacement of the existing structure and would be complimentary to the concept of the overall scheme and to this part of the site/context. The single-storey extension to form a 'living' space is considered an contemporary extension that would sit comfortably between the two projecting elements of the south elevation of the building and provide additional accommodation for the basement and its access and connectivity to the proposed community garden area. The proposal to breach the listed boundary wall/railings is regrettable as this forms an existing continuous boundary to this side of the site. However, in considering the principle of a new extension and entrance in this location a breach of the boundary would be needed. Two new stone gateposts (matching those to Century Hall) are proposed where the boundary wall/railings is breached. Subject to exemplary detailing between the breached wall/railings and the new stone posts (and altered existing railings) it is considered that this traditional approach to this particular element is an appropriate way

forward presenting an existing, but altered, connection to the past and architecturally enclosing and defining the area of the new extension. In terms of its impact on the listed buildings it is considered that the proposals have been carefully considered and junctions/abutments etc, have been thought through. Subject to exemplary detailing and external materials/finishes etc. it is opined that the new extensions would be complimentary to the existing historic buildings, its context and present a readable and definable narrative to the architectural ensemble of the building grouping.

Archaeology (DCC)

- 5.4 With regard to below-ground archaeological remains, the proposal site is within the medieval core of Ashbourne as defined in the Extensive Urban Survey compiled by Derbyshire County Council and English Heritage in 2001. The site lies within medieval component 12 'settlement along the south side of Church Street', an area of long narrow burgage plots with boundaries running back to Henmore Brook. The applicant has submitted an archaeological desk-based assessment which makes a reasonable assessment of archaeological context and potential.

The previous applications attracted a recommendation for conditioned archaeological work because of the proposed new build elements to the rear. These have now been removed from the proposals and replaced with the proposed community garden where groundworks will be relatively unintrusive. It is therefore recommended that there is no need for archaeological involvement within the current scheme.

Cllr A Bates

- 5.5 No objection.

6.0 REPRESENTATIONS RECEIVED

- 6.1 None

7.0 OFFICER APPRAISAL

The following material planning issues are relevant to this application:

- Impact upon heritage assets

- 7.1 The site includes both principle Grade II Listed Buildings together with curtilage Listed Buildings within Ashbourne Conservation Area, occupying a prominent site on the main route through the centre. The buildings are used by Ashbourne Methodist Church for community uses and the proposed extensions and alterations would create a new Link Community Hub as part of the Derbyshire Dales District Council 'Ashbourne Reborn' levelling-up transformation. The principle of the link extension and extensions and alterations to the rear of the church and Chapel House were established in the granting of Planning permission in 2021 with a variation of condition granted earlier this year.

- 7.2 Below is a summary of the amendments to the previous approvals:

1. Amendment to doors on northeast elevation of Cornerstone to provide access for external seating outside the church frontage – set back from Church Street.
2. Addition of re-roofing works to several elements of the existing building arrangement to ensure longevity and to minimize future maintenance requirements. All areas of re-roofing will be reinstated to match the existing materials/details. Lightning protection installed if required to main Church.
3. Amendments to the scale and appearance of the proposed flat roof extension between the main Church and Century Hall building. The footprint is increased slightly so that it can provide enough space for the required toilet facilities. The appearance is amended to better reference elements of the existing buildings.

4. Addition of a proposed extension to the lower ground level Gateway accommodation that provides a communal living area fronting onto the community garden.
5. Addition of a community garden and landscaping scheme to the rear site in place of the proposed residential accommodation and includes a proposed accessible access route directly from Station Road to the new community gardens.
- 7.3 The justification for this proposal is that it would connect all three buildings into one complex providing a single street-level access and by removing the fixed pews in the main worship space and addressing the heating, toilet and catering issues. This would achieve the ambition of the Methodist Church to become a 7 day-a-week church and community hub, providing such things as a large performance space, small and medium size rooms as well as halls for private hire and public use (with catering facilities), a coffee shop and open safe space which would be a community hub and drop-in centre. The church at present supports significant voluntary activity (conducted both by church members and those that are not) and with the modernisation of the premises it is expected that this activity would expand further, for the benefit of the local community.
- 7.4 The physical requirements in order to achieve this include:
- providing a clear, visual link into the Worship space from the new entrance foyer and from Station Road. The central position of the opening is symmetrical in the west façade when viewed from both the entrance foyer and from inside the worship space which is reflective of the existing symmetry to the interior of the worship space.
 - The central position of the link building would accommodate the flow of people into and out of the worship space, particularly at the end of services when the congregation gather together. Building users would be able to stand on the galleried landing to either side of the opening so as not to restrict movement. This is particularly important for larger community events which the church is intending to host as a suitable venue does not exist in Ashbourne. The double doors also allow full access for DDA compliance
 - A secondary single door into the worship space is proposed at the northern end of the galleried walkway, the purpose of which is to enable late arrivals to join services without disturbing others or allowing parents/carers quiet access/egress with children when the area is partitioned as a crèche.

Impact upon Heritage Assets

- 7.5 The application is accompanied by a detailed Heritage Statement (HS) which assesses the significance of the assets taking account of the Conservation Area Character Appraisal and views that allow the significance of the assets to be appreciated. In respect of views the report states:-
- “The church is prominent in views in both directions along Church Street, identified in the Conservation Area Character Appraisal as key views and allowing the elaborate design of the front elevation to be appreciated. Although both the church and Century Hall are prominent in views north along Station Road, these are not identified as key views and only the church is identified as a prominent building in the streetscape”.* The conclusion of the report is that the harm caused by the development is offset by substantial public benefits with the proposals considered beneficial overall.

New Extension to Church:

- 7.6 It is considered that the principle of a modern, contemporary, extension within the courtyard is an acceptable proposal in this context but this is heavily reliant on its constructional details and materials and its relationship and abutments etc. with the adjacent buildings. Some details have been submitted and these show that as light a touch (i.e. in terms of abutments and junctions etc.) as possible is being proposed. The junction or abutment of the new extension with the west elevation of the church is the most important. The proposal is to join the new extension roof at the horizontal transom point to the run of five tall, semi-circular,

headed windows. Due to their height the original window frames were designed to be divided with a (painted timber) transom at half their height. In earlier iterations of the scheme the roof junction at this point was a flat roofed abutment with a narrow glazed clerestory detail. Following concerns raised about the solidity and robustness of such a junction a proposal, as now submitted, has been formulated whereby the junction/abutment is a sloping structural glass roof. The abutment detail with the transom has been submitted and this is considered to be satisfactory. Whilst glass is never truly 'invisible' the size and shape of the sloping glass roof at this point/junction would allow the lower part of the tall windows to have some visibility thus preserving, as much as possible, the western elevation of the church.

- 7.7 It is noted that the basement windows to the courtyard side of the main church (and those to the basement of Century Hall) would be fully concealed by the proposed extension. The original design concept of the main church (and in some respects to Century Hall) was for these particular windows to have a less architectural/decorative treatment than those to the main body of the church/upper part of Century Hall. This is reflected in the design of their openings and their window frames. In this regard, there is considered to be more scope to subsume these particular windows within the proposed 'Lower Ground' floor level. It is noted, however, that they would be visible/exposed within the internal circulation areas of the lower level allowing the original architectural treatment and the sense of a modern 'infill' to the courtyard to be appreciated.
- 7.8 The proposed introduction of sections of fibre cement/porcelain cladding (stone colour) is a contemporary way of representing ashlar stonework. In the areas proposed this is considered to be acceptable. The remaining external material for the main extension is zinc cladding (and structural glass). It is considered that the use of a zinc cladding (subject to approval of a sample and its proposed colour finish etc.) in combination with the extensive use of structural glass will convey a relatively 'light' architectural infill to the courtyard and will be complimentary to the ornate period architecture, detailing and materials etc. of the three existing buildings surround it.
- 7.9 The current south-western element of the church is to be demolished and replaced. The current projection is of two-storeys (originally a stilted upper floor only the lower, open part, being filled in in the later 20th century) with a dual pitched roof over. Its proposed replacement, on a similar footprint and scale, is to contain a garden entrance lobby and toilets to the first floor and is to be constructed in matching brickwork with a zinc clad coped parapet to a flat roof and stone copings. The windows are to be modern. It is considered that the proposed replacement structure/building is an acceptable replacement of the existing structure and would be complimentary to the concept of the overall scheme and to this part of the site/context. The single-storey extension to form a 'living' space for the residential units in the basement sits between the two projecting elements to either side. It is to have a sloping zinc roof (subject to detailing and finish colour etc.) and its south facing wall is to be gully glazed. It is considered that this contemporary extension would sit comfortably between the two projecting elements of the south elevation of the building and provide additional accommodation for the basement and its access and connectivity to the proposed community garden area.
- 7.10 The proposal to breach the listed boundary wall/railings is regrettable as this forms an existing continuous boundary to this side of the site. However, in considering the principle of a new extension and entrance in this location a breach of the boundary would be needed. Two new stone gateposts (matching those to Century Hall) are proposed where the boundary wall/railings is breached. Subject to exemplary detailing between the breached wall/railings and the new stone posts (and altered existing railings) it is considered that this traditional approach to this particular element is an appropriate way forward presenting an existing, but altered, connection to the past and architecturally enclosing and defining the area of the new extension.

7.11 In conclusion, it is considered that a modern, contemporary, extension within the courtyard (and to the southern end) would be acceptable. In terms of its impact on the listed buildings it is considered that the proposals have been carefully considered and junctions/abutments etc, have been thought through. Subject to exemplary detailing and external materials/finishes etc. it is opined that the new extensions would be complimentary to the existing historic buildings, its context and present a readable and definable narrative to the architectural ensemble of the building grouping.

Chapel House:

7.12 Whilst the property has been, historically, enlarged it remains a curtilage-listed building. It is considered that the replacement conservatory is generally acceptable but this should be clad in an appropriate brickwork (not render). The amended plans have reinstated the chimney, removed the balustrade and altered the patio door to a window and therefore the proposed works to Chapel House would be deemed acceptable.

Development in curtilage:

7.13 The proposed removal of the 'pre-fab' structure and the modern lean-to to the small shop are considered acceptable. The proposed landscaping and formation of a community garden adjacent to the Henmore Brook is considered an acceptable use of this plot of land which contributes to the setting and context of the building complex.

7.14 In terms of proposed development affecting a listed building(s), the 1990 Act places a requirement on an Authority to have special regard to the desirability of preserving the building, or its setting, or, any features of special architectural or historic interest which it possesses together with paying special attention to the desirability of preserving or enhancing the character or appearance of the Area. As a new architectural entity being imposed into a grouping of existing listed/historic buildings it is considered that there will be an element of harm to the character and appearance of the listed/historic buildings, to the setting of the historic/listed buildings and to the character and appearance of this part of the Conservation Area. However, under the guidance of the NPPF, it is considered that the proposed new extensions would not constitute substantial harm to the significance of the designated heritage assets. The NPPF advises that where a proposal(s) will lead to less than substantial harm that harm should be weighed against the public benefits of the proposal.

7.15 The public benefits of the scheme are considered substantial and are twofold. The proposal would not only ensure the future of these prominent Listed Buildings of a high significance within the town; it would also provide a flexible community facility not currently found in the area. The glazed link extension subject to exemplary detailing and external materials/finishes controlled by conditions would be complimentary to the existing historic buildings, its context and present a readable and definable narrative to the architectural ensemble of the building grouping. The proposals are considered to lead to less than substantial harm to the significance of the ensemble of historical buildings through both the attached extension and to the character and appearance of Ashbourne Conservation Area. When this is weighted against the significant public benefits and the consequence of providing a viable use for all of the existing buildings to secure not only the future of the church but the long term community use of the buildings; these public benefits are considered to outweigh the harm to the heritage assets.

7.32 Conclusion

This proposal represents the aspirations of the Methodist Church to retain and utilise all the buildings within the site with a view to the future provision of a flexible community building for the use of both by the Church and the residents of Ashbourne. The internal changes have been adequately justified to achieve the aim of flexible use of the building and are

considered less than substantial impacts. The harm to the significance of the Listed buildings and harm of the scheme to the character and appearance of the Conservation Area have been assessed in detail and on balance it is considered that the less than substantial harm identified is outweighed by the very clear and substantial public benefits of the scheme. The proposal is therefore considered to accord with the relevant local plan policies and guidance with the NPPF. As the works could have implications on protected species, it is recommended that authority be delegated to the Development Manager or Principal Planning Officer to grant listed building consent, following confirmation from Derbyshire Wildlife Trust in respect of the associated full application (code ref. 23/01092/FUL) that the works are acceptable with or without changes that do not require listed building consent to satisfy the requirements of the Wildlife and Countryside Act.

8.0 RECOMMENDATION

That authority be delegated to the Development Manager or Principal Planning Officer to grant listed building consent, following confirmation from Derbyshire Wildlife Trust in respect of the associated full application (code ref. 23/01092/FUL) that the works are acceptable with or without changes that do not require listed building consent, subject to the following conditions and any additional conditions recommended by the trust that are relevant to this application.

1. The works hereby permitted must be begun before the expiration of three years from the date of this permission.

Reason:

This is a statutory period which is specified in Section 18 of the Planning (Listed Buildings and Conservation Areas) Act 1990.

2. The development hereby permitted shall be carried out in accordance with the following plans:-

- Location Plan 01
- Schedule of Work to Listed Buildings 4085 Rev A
- Proposed Site Plan 4085-03A
- Proposed Lower Ground Floor Plan 4085-04A
- Proposed Upper Ground Floor and First Floor Plans 4085-05A
- Proposed Roof Plan 4085-06A
- Proposed Elevations 4085-07A
- Landscape Strategy Plans 1288 001B, 002B, 100, 101, 102B, 200, 201, 202, 301, 302, 401, 402, 501A, 502B, 503 and 504
- Chapel House – Proposed Plans and Elevations 4085-09-D
- Indicative Sections 4085-10A
- Indicative Details 4085-11

unless as otherwise required by condition attached to this permission or following approval of an application made pursuant to Section 96A of the Town and Country Planning Act 1990.

Reason:

For the avoidance of doubt.

3. Full constructional details of all new external window and door joinery and/or metal framed windows and doors (including finish colour) shall be submitted to and approved in writing by the Local Planning Authority prior to installation. The submitted details shall include depth of reveal, details of heads, cills and lintels, elevations at a scale of not less than 1:10 and

horizontal/vertical frame sections (including sections through glazing bars) at not less than 1:2. The works shall be carried out in accordance with the approved details.

Reason:

To preserve the special character and appearance of the listed buildings and comply with policies contained within the National Planning Policy Framework - 2019 (Conserving and Enhancing the Historic Environment), National Planning Policy Guidance and the Historic England Advice Note 2.

4. Samples of all facing and roofing materials shall be submitted to and approved in writing by the Local Planning Authority before works commence on the facing walls or roof of the building(s). The works shall thereafter be constructed in accordance with the approved details.

Reason:

To preserve the special character and appearance of the listed buildings and comply with policies contained within the National Planning Policy Framework - 2019 (Conserving and Enhancing the Historic Environment), National Planning Policy Guidance and the Historic England Advice Note 2.

5. A sample of the brick and details of the proposed brick bond (together with a sample panel of brickwork [1 sq.m] erected on site) to be used for the external surfaces of the proposed development shall be submitted to and approved in writing by the Local Planning Authority before works commence on the construction of the exterior walls of the building(s). The development shall thereafter be constructed in accordance with the approved details.

Reason:

To preserve the special character and appearance of the listed buildings and comply with policies contained within the National Planning Policy Framework - 2019 (Conserving and Enhancing the Historic Environment), National Planning Policy Guidance and the Historic England Advice Note 2.

6. Full construction details shall be submitted for the following prior to installation:-
 - detailing between the breached wall/railings and the new stone posts (and altered existing railings)
 - The new 'open metal staircase' on the north eastern elevation.

The works shall thereafter be constructed in accordance with the approved details.

Reason:

To preserve the special character and appearance of the listed buildings and comply with policies contained within the National Planning Policy Framework - 2019 (Conserving and Enhancing the Historic Environment), National Planning Policy Guidance and the Historic England Advice Note 2.

9.0 NOTES TO APPLICANT:

The Local Planning Authority prior to and during the consideration of the application engaged in a positive and proactive dialogue with the applicant which resulted in the submission of a scheme that overcame initial concerns relating to the Beech Tree and design of Chapel House extension.

The Town and Country Planning (Fees for Applications and Deemed Applications, Requests and Site Visits) (England) Regulations 2012 (SI 2012/2920) stipulate that a fee will henceforth be payable where a written request is received in accordance with Article 30 of the Town and Country Planning (Development Management Procedure) Order 2010. Where written confirmation is required that one or more Conditions imposed on the same permission have been complied with, the fee chargeable by the Authority is £97 per request. The fee must be paid when the request is made and cannot be required retrospectively. Further advice in regard to these provisions is contained in DCLG Circular 04/2008.
